OVERVIEW

NASY Construction Limited was started in 1988 to provide quality and sustainable construction services with special focus on integrity, excellence, cost effectiveness & promptness. The mission of NASY Construction Limited is to provide quality construction services at fair and market competitive prices while maintaining the highest level of professionalism, integrity and fairness in our relationships with our clients, suppliers, subcontractors and professional associates.

A successful family business, we have grown over the years yet remain innovative and committed to the very values this company was built on—integrity, excellence and cost effectiveness. With a team of driven and creative minded people, we continue to be successful. We are motivated by our commitment towards achieving quality and sustainable improvement in Ghana's construction industry.

MISSION & VISION

Our Mission

To perform for our clients, the highest level of quality construction services at fair and market competitive prices.

To maintain the highest level of professionalism, integrity, honesty and fairness in our relationships with our clients, suppliers, subcontractors and professional associates.

Our Vision

- To become a leading construction & project management company in Ghana.
- Customers and partners will see us as integral to their success.
- People will be proud to work at NASY.
- Communities will regard us as responsive and responsible.
- We seek to add significant value in our areas of operation by focusing on market areas and services where we are able to bring significant added value through our in-house expertise & resources.

OUR SERVICES

Nasy Construction focuses on those market areas and services where we are able to bring significant added value through our in-house expertise and resources.

Our core construction business is geared to creating individual, innovative and dynamic building environments and solutions for customers ranging from property developers to end-users, government bodies and public sector agencies.

OUR SERVICES

Design & Build

At Nasy our design and build contracts bring enhanced communication between the service provider and the client, increased accountability by the service provider, single source project delivery, and a value based project feedback system.

Traditional Contracting

If the preferred procurement route is a traditional form of contract, Nasy Construction Ltd offers a wide range of experience in this sector. As in all we do, Nasy takes a non-adversarial approach to construction and will highlight potential delays or cost increases as early as possible. Our capability in this sector is best highlighted by majority of our projects.

OUR SERVICES

Pre-Construction Consulting

Prior to project start we will work with the client to determine and design in risk adverse 'buildability', (i.e. that it can be built, it will be built, it will be problem free) and to ensure 'economy' (i.e. that it can and will be delivered at the required price).

Plant Hire

We offer a wide range of plant equipment, including trailers, bowsers, generators, forklift trucks, vibrating plates, skid steer loaders, air tools, breakers, compaction equipment, shot blasting equipment, compressors, dumpers, rollers, power barrows, excavators and tele handlers.

OUR SERVICES

Management Contracting

Nasy Construction Limited maintains specialist Management Contracting teams with a wide range of skills required to successfully manage and deliver projects.

Special Interests

Our areas of special interest include but are not limited to;

- Residential & industrial development;
- Office facilities;
- Bridges & other related concrete structures;
- Renovation & refurbishment of buildings;
- Pre-construction consulting;
- Traditional contracting;
